SUMMARY

Experienced Software Engineer with a demonstrated history of working in the information technology and services industry. Bearing an experience of almost 4 years by working under different projects. Keenly interested to work as a JAVA developer where I'll have opportunities to showcase my skills for the professional advancement of the company & work with people, I can really learn from.

SKILLS

- | | |
|----------------------|----------------------------|
| ➤ JAVA J2-EEE | ➤ MYSQL |
| ➤ Spring Boot | ➤ Multithreading |
| ➤ Spring MVC | ➤ Microservices |
| ➤ Rest API's | ➤ AWS Lambda |
| ➤ Stubbing & Mocking | ➤ Spring Batch |
| ➤ Kafka | ➤ Jenkins, Central Station |
| ➤ Thymeleaf | ➤ Pub/Sub |
| ➤ React JS | ➤ JavaScript |
| | ➤ Oracle |

Frameworks – Spring, Hibernate, JUnit, Mockito

WORK EXPERIENCE

- **Ernst and Young (EY GDS)** – (June 2024 to present)
 - Security Analyst
- **Raju Tech India private Limited** - (May 2022 – Dec 2023)
 - Software Engineer

PROJECT SUMMARY

Project : FORD MOTOR CREDIT COMPANY (FMCC)

Domain : Billing Platform

- Led the design, development, and enhancement of the billing platform to improve invoice generation and management systems.
- Contributed to modernizing the legacy invoicing system by transitioning to a more efficient, scalable platform using Java technologies and microservices architecture.
- Refactored and optimized existing code for performance improvements and better maintainability.

- Worked on integrating third-party payment processing and invoicing systems into the platform to ensure seamless data exchange.
- Managed and optimized SQL/NoSQL databases to handle large-scale billing data, ensuring quick access and data integrity.
- Developed and maintained RESTful APIs for invoice generation, billing updates, and integration with other Ford systems.
- Participated in unit and integration testing to ensure that all new features and changes met business requirements.
- Worked closely with cross-functional teams, including product managers, QA engineers, and business analysts, to deliver high-quality solutions.
- Actively participated in agile ceremonies like sprint planning, daily stand-ups, and retrospectives to ensure timely delivery of project milestones.
- Created a GitHub repository using Central Station and set up a robust CI/CD pipeline to automate testing and deployment for the project.
- Utilized Pub/Sub messaging systems for event-driven architecture, enabling real-time data processing and updates within the billing platform.

Project : Project On Track

Domain : Construction ERP Product

- Worked in agile framework as an individual contributor Responsibilities include - Interaction with Business team in story grooming, reviewing story/acceptance criteria.
- Experience in Microservices Architecture using Springboot and ORM technologies such as JPA & Hibernate.
- Implemented multithreading to optimize item service calls to minimize the load by half.
- Enabling Spring Security by integrating it with OKTA for the complete web app.
- Troubleshooting and resolving the user stories and its defects allocated in JIRA.
- Hands on experience with build and deployment tools including Maven, logging and debugging usingSlf4 and Log4j, unit and integration testing using JUnit.
- Developing RESTful APIs using Spring Boot & Postman which is used to provide services to app .
- Hands-on experience in using CI/CD pipeline in Gitlab for deploying the code.
- Create team specific Agile process flow in JIRA to move tasks from one activity to another.

EDUCATIONAL QUALIFICATIONS

MCA (Master of Computer Application) from Osmania University ,Hyderabad.
